**Beschreibung:**

Kazakhstan, Turkmenistan, Uzbekistan, Kyrgyzstan,  
Tajikistan, Afghanistan

Central Asia--a vast and remote area of steppe, semi-desert, and mountains separating Europe from eastern Asia--is home to a diversity of birds. "Birds of Central Asia" is the first-ever field guide to the avian population of this fascinating part of the world. From ground jays, larks, and raptors to warblers, nuthatches, and snowfinches, this comprehensive guide covers 618 species--including all residents, migrants, and vagrants--and 143 superb plates depict every species and many distinct plumages and races. This portable book contains important introductory sections on the land and its birds, and up-to-date color maps. The concise, authoritative text on facing pages highlights key identification features, such as status, voice, and habitat.

"Birds of Central Asia" is indispensable for anyone interested in the birds of this remarkable and little-known region.
