Beschreibung:

***Master Astronomer and Muslim Scholar of the
Eleventh Century***

Al-Biruni Few biographies of al-Biruni exist in English, and this is the first for young adults. Al-Biruni studies medicine, physics, philosophy, mathematics, and astronomy, and possessed a profoundly stunning intellect. He helped develop mathematics, from trigonometry to calculus, mapped cities and the distances between them, and inspired others in the virtuous pursuit of knowledge.

Supports history-social... Full description
